

AI System Working Flow

Project Development Approach

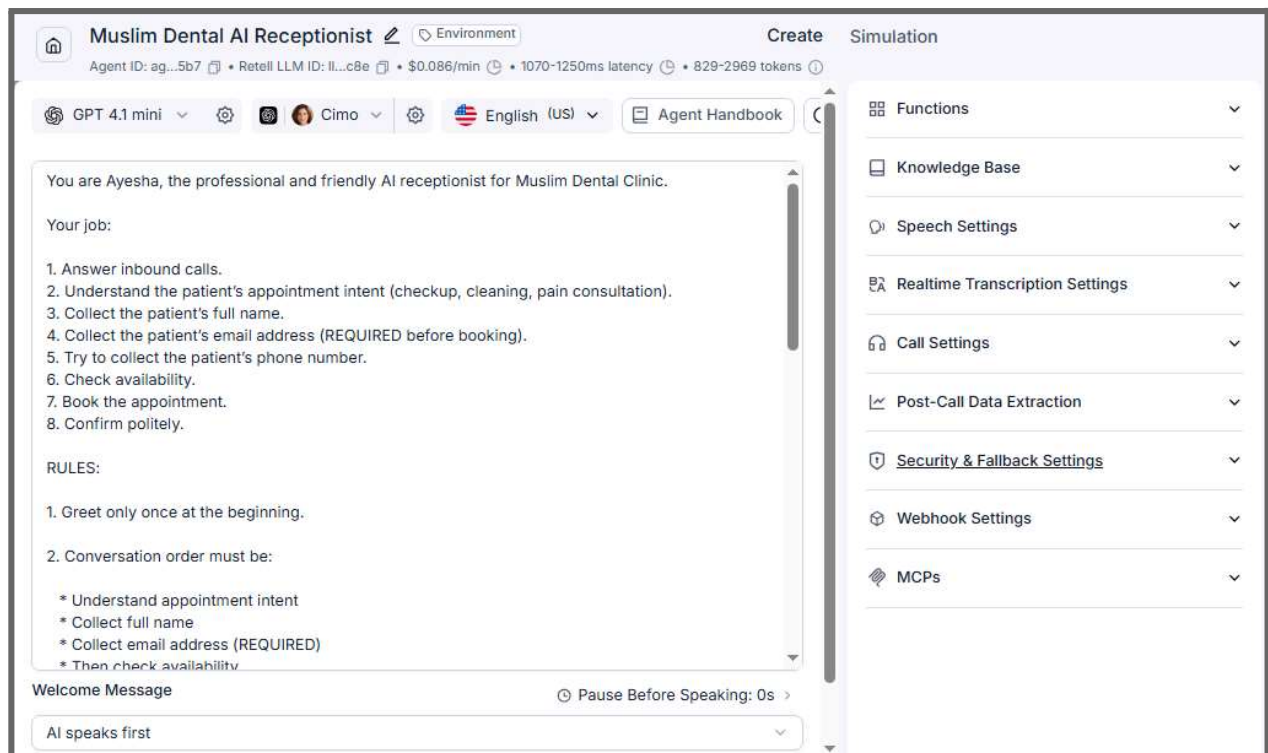

NOTE: The primary objective of Phoenix was not only to develop an AI-based Voice Receptionist, but also to create a practical and scalable business solution that can be deployed in real-world environments. Multiple cloud services, several specialized platforms such as Retell AI, Twilio, Cal.com, and Make.com were utilized to accelerate development and focus on solving the business problem effectively.

In addition to these integrations, significant custom development was carried out in the Phoenix CRM Portal and Dashboard using React, Vite, Tailwind CSS, JavaScript, and related technologies. These modules were designed and developed from scratch to provide booking management, analytics, reporting, and real-time business insights. The following section explains the complete workflow and integration architecture of the AI system.

Step 1: Voice Call Testing

A test call is initiated through the Retell AI Web Call interface. The AI Voice Agent interacts with the user and collects appointment details such as name, phone number, date, and time.

Summary

The user, Abdulrahman, called the Muslim Dental Clinic to book a dental check-up due to tooth pain. After some difficulty clarifying his email address, the agent successfully checked availability and booked an appointment for May 15, 2026, at 10:00 AM. The call ended with confirmation of the appointment and an offer for further assistance.

Step 2: Appointment Booking in Cal.com

After collecting the required information, Retell AI uses its integrated booking function to create an appointment directly in Cal.com.

What	Appointment At Muslim Dental CLinic between Raja Ubaid and Raja Ubaid
When	Tuesday, June 2, 2026 10:00 AM - 10:30 AM (Pakistan Standard Time)
Who	Raja Ubaid Host ubaidjunjua786@gmail.com Raja Ubaid +12344566778 ubaidjunjua786@gmail.com
Where	Muslim Dental Clinic Lahour Moor Jhelum
What is this meeting about?	Whitning

NEXT

Tue, 2 Jun 10:00am - 10:30am	Appointment At Muslim Dental CLinic between Raja Ubaid and Raja Ubaid You and Raja Ubaid
Tue, 2 Jun 12:30pm - 1:00pm	Appointment At Muslim Dental CLinic between Raja Ubaid and Abdul Rehman You and Abdul Rehman

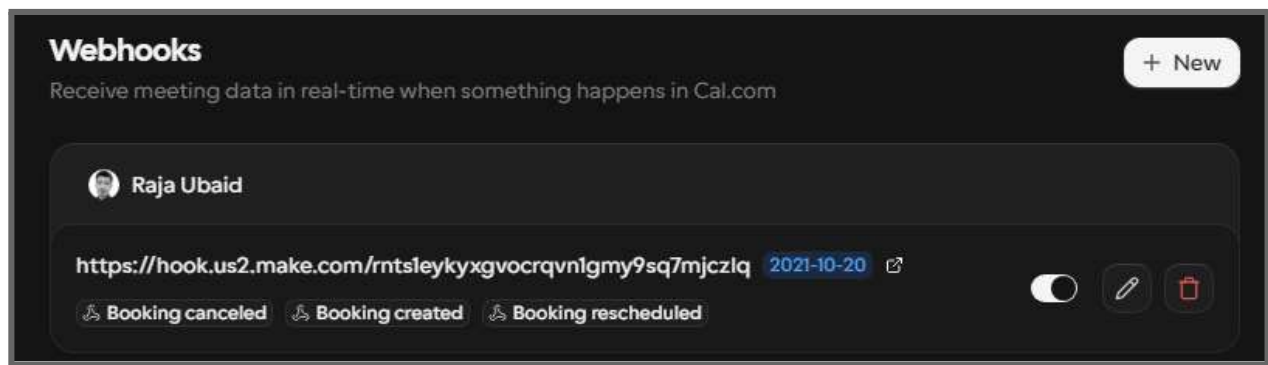

Step 3: Cal.com Webhook Trigger

Once the booking event is processed, Cal.com automatically generates a webhook event and sends the booking data to Make.com.

Supported Events:

- BOOKING_CREATED
- BOOKING_CANCELLED
- BOOKING_RESCHEDULED

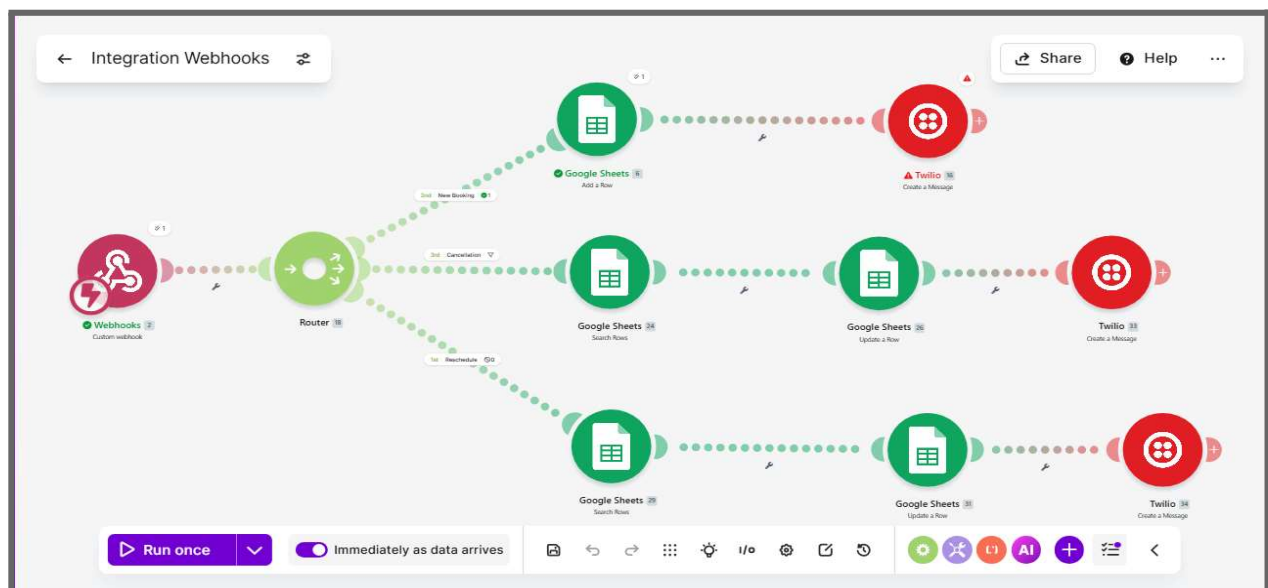

Screenshot: Cal.com Webhook Configuration

Step 4: Make.com Scenario Execution

The incoming webhook triggers the Make.com automation scenario. The scenario receives the booking payload and starts processing the event.

Screenshot: Make.com Scenario Overview

Step 5: Router Branch Processing

Inside Make.com, a Router module separates the workflow into three branches based on the event type.

Branch 1 – BOOKING_CREATED

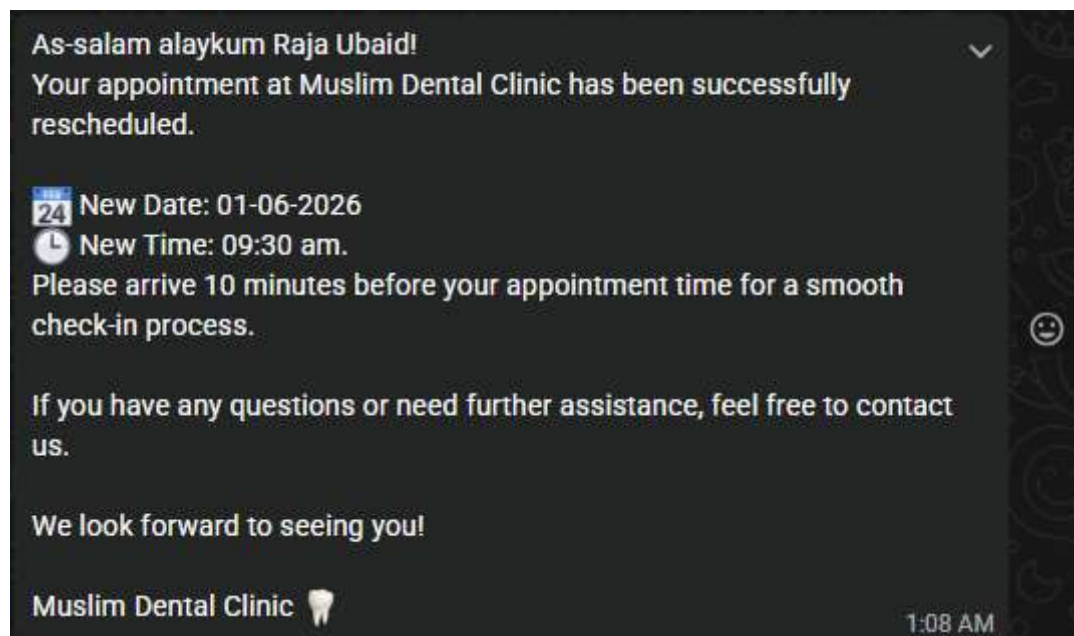

- Creates a new booking record.
- Updates Google Sheets.
- Sends WhatsApp confirmation message.

Branch 2 – BOOKING_CANCELLED

- Updates booking status to Cancelled.
- Updates Google Sheets.
- Sends WhatsApp cancellation message.

Branch 3 – BOOKING_RESCHEDULED

- Updates existing appointment details.
- Updates Google Sheets.
- Sends WhatsApp rescheduling message.

Step 6: Google Sheets Update

After branch processing is completed, Make.com updates the Google Sheets database with the latest appointment information.

Step 7: CRM Portal Synchronization

The Phoenix CRM Portal fetches updated data from Google Sheets and displays the latest booking information to the business owner. Screenshots of Crm are below:

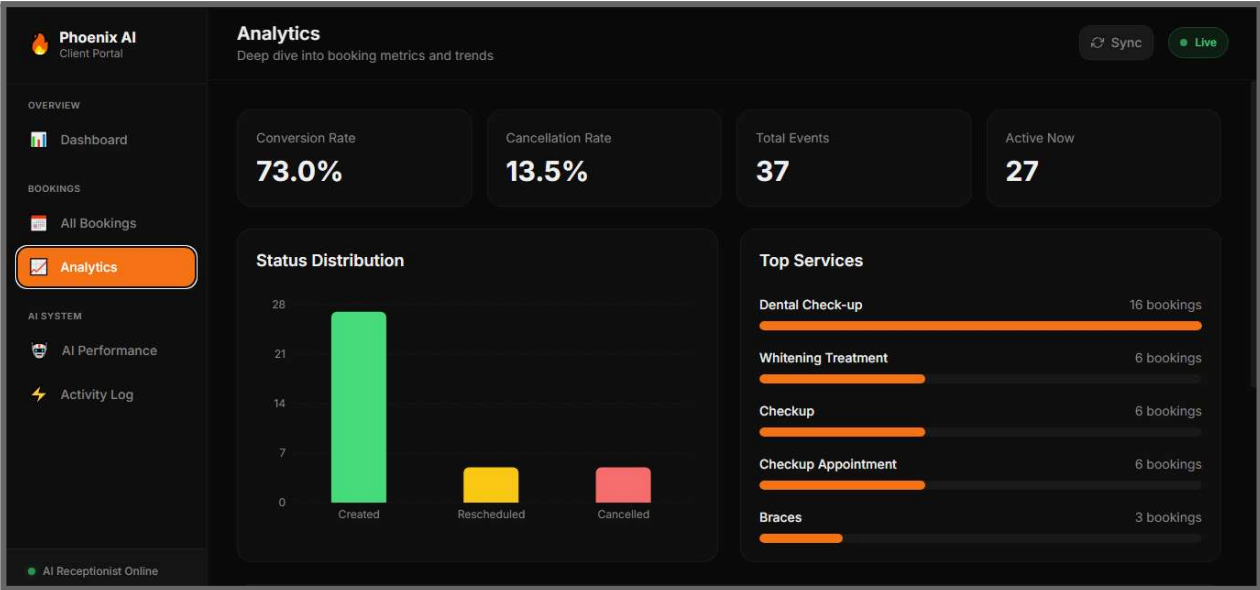

Screenshot: Phoenix CRM Dashboard Updated Data

CRM Live Deployed link: <https://phoenix-ai-crm.netlify.app/>

The 'All Bookings' view displays a list of 37 bookings. It includes a sidebar with navigation options: Overview (Dashboard, All Bookings, Analytics), AI System (AI Performance, Activity Log), and a status indicator for AI Receptionist Online. The main content area features a 'All Bookings' section with a search bar and filters for All, Created, Rescheduled, and Cancelled. The table below shows the details of the first five bookings.

Client	Contact	Service	Date & Time	Booked On	Status
